Following are several projects developed between 1980 and 1990. These projects were created well before the computer dominated every aspect of design and were constructed using traditional cut-and-paste, pen-and-ink techniques.

"Steven R Gilmore's use of dense, multi layered imagery predated what would be possible to do on a Mac by almost a decade and that, tempered with his more esoteric sensibilities, single handedly defined the look of industrial music during the mid to late 80's, a trend that continues to this day." David J. Weissberg *Swindle Magazine*

CHRIS AND COSEY
Exotika
Today we have tremendously diverse kinds of music. This album leads you into the world of Exotik music. Each track pulsates with the vigour of the uninhibited, fulfilling the esoteric and titillating the uninitiated. A stimulating musical adventure.
